

Heating Table

The heating table is perfect for catering business as well as for household use. Both upper and lower surfaces are heated up to 40-45°C. Temperature may be easily changed as needed.

Surface can be manufactured of ceramic, porcelain and glass. The heated surfaces are used to warm up a meal and keep it warm for as long as necessary.

The table also provides comfortable and pleasant warmth to thighs and feet. The ambient temperature can be lowered to 1-2°C. Besides its direct applications, heating table may be used as a perfect room heater. In particular several tables can easily replace conventional heating.

The table is suitable for indoor use only.
